While these statistics provide some indication of the use of project controls data in business, it is important to note that the adoption of these tools varies widely depending on the industry, company size, and other factors, but these averages and totals provide insights how we can help you

Introduction to Queryon

ABOUT US

Queryon was formed in 2015 as the spin off of a larger technology company, we came together to focus on data solutions for mid to enterprise level businesses. We set out with a vision to create a company that is big enough to scale and small enough to care. We've been a distributed and authentic team from day one and a trusted Microsoft Gold Partner.

WHY CHOOSE US

PROFESSIONAL

Our team of experts is dedicated to providing you with accurate and reliable data solutions, while upholding the highest standards of professionalism.

TRUSTED

We understand that data security is of the utmost importance to our clients. That's why we prioritize the safeguarding of your data at every step of our process.

CULTURE

Our people are our greatest asset and our clients are partners. That's the attitude Queryon brings into every project.

OUR FIRM

Queryon is a team of professional developers, business analysts, and project managers working collaboratively on challenging data problems. Queryon was incorporated in 2015 in Alaska. Thirty percent of our team is living in Alaska with other team-members distributed throughout the United States.

Our approach is to deliver high quality consulting using best practice techniques in the industry. Queryon projects are complex. To deal with this challenge we use an agile methodology to foster creativity but pair it with structured and sound organization including regular status reports, clear project scope and change process, regular team check-ins, and a streamlined communication model using a single point of contact on both sides. Our team uses standard tools for development and project management in the industry but also will use client preferred systems to facilitate better project communication.
